International Cooperation

In a globalised world, international cooperation is more important than ever. The Stockholm–Mälar region is strategically located in the increasingly strong and increasingly well-integrated Baltic Sea region, and has every chance of becoming the natural hub of this region. It is therefore essential that Stockholm is an active player on the international arena and prioritises collaboration with other European regions and cities, above all in northern Europe.

Wide Variety of Urban Settings

Stockholm is among the most beautiful of the world’s big cities, offering a unique combination of vibrant, big-city living and the tranquility of the countryside. There is a wide variety of attractive neighborhoods, each with its own identity, enabling local people to choose the part of the city best suited to their circumstances and lifestyle.

In the outer city meanwhile, developments at places like Farsta, Älvsjö, Sätra and Vällingby have provided new workplaces and new homes. Järva and Vantör have continued to build on their multicultural traditions, and exciting new jobs are now available in such sectors as language, technology and culture.

World-Class Business

The Stockholm–Mälar region has a world-class business climate providing the ideal conditions for businesses to take root and grow. The region is home to all kinds of companies, from big, high-tech corporations to small start-ups in the creative sector, developments have been strong. Culture, sports and entertainment are creating jobs, export opportunities and growth. Stockholm is world famous for its dynamic, richly varied cultural offering. The business climate is based on simple, unambiguous tax rules and clearly formulated directives, making it easy and profitable to start up and run a business. Businesses are also supported by first-class infrastructure.

The region offers efficient road and railway networks, high-capacity ports and airports, reliable energy supply systems and an IT infrastructure that is among the best in the world. Moreover, Stockholm is also Northern Europe’s number-one financial city, whose large financial sector creates unique opportunities for private companies to access capital when they need it.

Stockholm’s Vision 2030

These qualitative changes in the environment are reflected in the changed perceptions of the population. The Stockholm–Mälar region is undergoing a renaissance, with a new focus on sustainability, social responsibility, and quality of life. The region is becoming a leader in the global arena, with a reputation for innovation, excellence, and environmental responsibility.

This is reflected in the changing attitudes of the population, who are increasingly concerned about the future of the region and the planet. The focus is on creating a sustainable future, with a strong emphasis on renewable energy, recycling, and conservation. The region is also making significant investments in education and research, with a strong focus on developing new technologies and solutions to global challenges.
